

工作测振仪(巡检仪)

HY-106 is a portable vibrometer with the function of record. It can be used to measure either vibration or surface temperature of the facilities. Via an infrared communication port, together with the related software of management, the HY-106 can communicate with a PC to achieve the functions of either generating and downloading the scheduled tasks, uploading the measured results. The condition analysis can then be carried out on the PC. High ratio of performance/price is the outstanding feature of the kit.

Key Technical Parameters

- Data Memory 512 Kbytes
- A graph dots matrix LCD display complete Chinese text
- Using Touch Memory™ to identify the scheduled facility automatically
- Afford a real time clock

一种 便携式数据采集仪。既可测设备的振动量又可测表面温度。拥有红外通讯接口，利用PC机和相应的管理软件完成诸如计划任务生成和下达，数据回收，状态分析等功能，是一种高性能价格比的状态监测工具。

技术 参数

- 存储容量为 512 K 字节
- 可测量加速度，速度，位移和温度
- 液晶图形显示，全中文
- 采用 Touch Memory™ 技术自动识别被测设备
- 实时时钟
