

快速油质分析仪

It can indicate the deterioration of oil quality in service via measuring the dielectric constant of the sampled oil, and can fully satisfy the requirements of fast and convenient monitoring.

Main Feature

- Measuring the cleanness on the surface of the transducer
- Auto zero calibration
- Data storage function
- Chinese letter display on the screen

通过 检测介电常数的变化来反映在用油液的劣化程度，可以满足现场对油质测定的迅速，简捷的要。

主要功能

- 传感器的清洁度检测
- 自动调零
- 数据存储功能
- 全中文显示
